			220	20

the symbol ▲ indicates the temperature rise to°C ▲

Mechanical properties

Heat treatment: quenching at 870 °C in oil, tempering at 560°C. For information

R	N/mm ²	1430	1080	1000	900	800	440
Rp 0.2	N/mm ²	1250	850	780	680	530	270
Test at	°C	20	400	450	500	550	600

Tempering table values at room temperature after quenching at 870 °C in oil

Alloyed tool steel subject to high working temperatures

- high resistance to thermal shock and heat cracking
- good mechanical characteristics in hot and cold condition
- good toughness in hot condition
- the high micro-purity and structural homogeneity levels give this grade good suitability to polishing and photo-engraving
- good suitability for welding operations
- applications: *dies subject to low pressure, mantle, extrusion press blocks, punches, dies and sleeves for extrusion presses*
